BSD

Engineering & Design

BSD is a privately owned consultancy firm originally established by a group of young engineers to provide engineering solutions.

We are a mix blend of young talent and experienced personal which makes us a dynamic team to look forward in the field of engineering.

We provide complete design & engineering solutions in Plumbing, fire fighting, Electrical & ELV systems.

We have the ability to deliver coordinated MEP design solutions which results in reduction of project completion time and increase in client profitability.

We can cater to the following segments

Mixed used development Projects.

(Commercial Offices, Residential Towers & Shopping Complexes).

Luxury Hotels.

Hospitals.

Airports.

Industries & Infrastructure Facilities.

We Add Value

The Value Proposition: We can add value to the client projects by providing cost effective Design & Engineering Solutions.

Construction Cost:

Design: Clients benefits from our design solutions that are an optimum mix of cost & performance.

Value engineering:

Existing designs are studied and are optimized by us to installation & operational costs.

Projects:

Clients Projects are benefited by accelerated installations and rework elimination by providing them with coordinated MEP engineering solutions.

Operating Costs:

Client operating cost is also significantly lowered, as also tangible improvement in the occupant's comfort and indoor environment is brought about through our energy efficient design solutions and optimized selection of equipments.
